PROFILE

Web Developer with a Bachelor's degree in Business Intelligence and postgraduate training in web development. Comfortable working with different technologies and development environments, with a focus on creating clean, practical, and reliable web solutions.

WORK EXPERIENCE

- **Freelance Web Developer**
06/2024 to Present

Built custom web solutions for clients while using AI-powered tools to speed up research, development, debugging, and idea validation without losing focus on quality and real client needs.
- **GROCERY STORE ASSOCIATE — SUMMERHILL MARKET, TORONTO, ON**
09/2025 to Present
 - Troubleshoot and update electronic price tags to ensure accurate product information and pricing.
 - Operate and assist with label-printing and other store equipment, resolving basic technical issues when needed.
- **WEB DEVELOPER — ERIBAT MÉDIA | MONTRÉAL, QC**
06/2026 to 08/2026
 - Used AI-powered development tools alongside modern web technologies to accelerate coding, debugging, testing, and problem-solving while building tailored web solutions.
 - Explored practical ways to integrate AI into the development workflow, improving efficiency and supporting faster delivery of reliable, user-focused features.
- **WEB DEVELOPMENT INTERN — BOX2HOME | FRANCE**
01/2024 – 06/2024
 - Worked within the IT department of a leading transportation company in France, contributing to the development of a package-tracking system using the MERN stack and Business Intelligence tools to transform tracking data into interactive dashboards.
